# Capstone Presentation

By Eric Sundstrom

# Natural Language Processing (NLP)

 Programming Computers to Process / Analyze Human Communication

- Popular Applications:
  - Text-to-Speech
    - Helps Visually Impaired
  - Sentiment Analysis
    - Useful in Marketing

## Toxic Comment Classification Challenge

# kaggle

#### Dataset:

Comments from Wikipedia Edit's
Talk Pages (2004-2015)

#### Multiple Labels of Toxicity:

- o toxic
- severe toxic
- obscene
- threat
- insult
- identity hate

#### Goal:

- Use Results for Detection/Removal
- Misc:
  - 4,550 teams, \$35,000 prize

## ML Process for NLP

- 1. Preprocessing
- 2. Tokenization/Stemming
- 3. Vectorization (TF-IDF)
- 4. Modeling

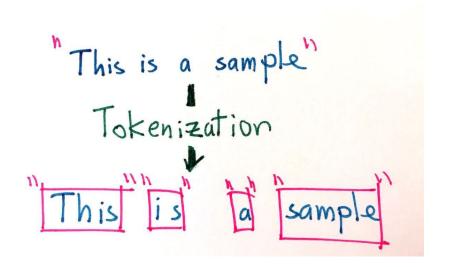

# Preprocessing

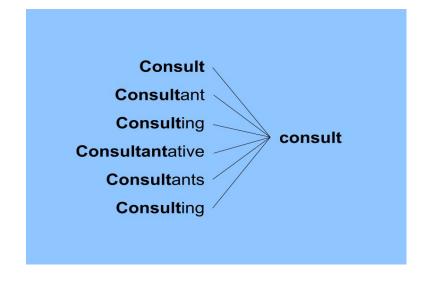

### • Filter Out Clutter

- Newline characters
- IP addresses
- Website urls
- Domain Specific Abbreviations
  - WP:: \_\_
  - User: \_\_
- Auto-Generated Text
  - "Preceding unsigned comment added"
  - "UTC"

## Tokenization

## Stemming

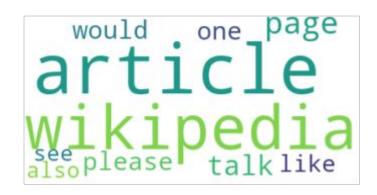

# TF-IDF (Term Frequency – Inverse Document Frequency

Vectorization

#### **Toxic Word Cloud**

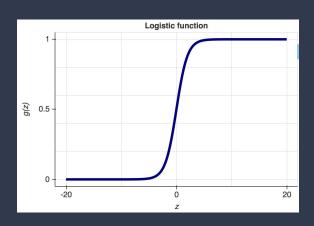

Non-Toxic Word Cloud

## Random Forest Model

- Huge Improvement by Parameter Tuning
- Scores
  - Toxic 95.47%
  - Severe Toxic 97.51%
  - Obscene 97.06%
  - Threat 98.49%
  - Insult 96.26%
  - o Identity Hate 97.62%
  - Overall 97.07%

## Logistic Regression Model

- Natural Fit
- Best Model
- Scores
  - Toxic 96.37%
  - Severe Toxic 98.51%
  - Obscene 97.68%
  - Threat 99.10%
  - Insult 96.95%
  - Identity Hate 98.19%
  - Overall 97.80%

## Models

## Logistic Regression

## Random Forest

- Natural Fit
- Scores
  - Toxic 96.37%
  - Severe Toxic 98.51%
  - Obscene 97.68%
  - Threat 99.10%
  - Insult 96.95%
  - o Identity Hate 98.19%
  - Overall 97.80%

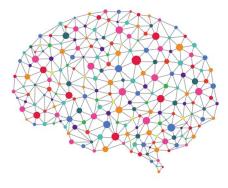

- Tree-based Example
- Scores
  - Toxic 95.47%
  - Severe Toxic 97.51%
  - Obscene 97.06%
  - o Threat 98.49%
  - o Insult 96.26%
  - o Identity Hate 97.62%
  - Overall 97.07%

## Model Scores Visualization

# Deep Learning

- Rudimentary Attempt
- Success? Inconclusive

# Interesting Stuff

- Better Without Preprocessing
- Improvement By Guessing?
- Stop Words Not Necessary for Informal Data?

## Results

- Winning Score 98.86% (171 entries)
- Popularity of Deep Learning
- My Model 2745/4550 on Leaderboard

**My First Kaggle Submission** 

# Moving Forward

- More Deep Learning
- Use GPU w/ GoogleColabs
- New Dataset?
